# flagger.ai

Your AI–assisted Cloud Security Companion

Get actionable insights on your cloud infrastructure. Flagger offers rapid, comprehensive assessments to pinpoint vulnerabilities and ensure compliance.

How secure is your Cloud Infrastructure?

Cloud Breaches

45%

In 2024, 45% of data breaches will target cloud-based systems.

Ransomware

79%

Ransomware is becoming increasingly dangerous and accounts for at least 79% of all reported cyberattacks.

Cloud-stored data

82%

Cloud security breaches have been on the rise for quite a while now. Plus, with the advent of technology, cyber threats are evolving faster than ever. This calls for understanding the trends, breaches, and challenges in the cloud.

Why Cloud Professionals Choose Flagger.ai?

Resource-Neutral Solution:
o Flagger.ai does not burden your AWS resources. No impact on your cloud infrastructure.
o No need for AWS credentials—your security remains intact.

Swift Sign-Up:
o Enroll in seconds using your Google or company account.
o Start exploring immediately—no lengthy setup.

Multi-Scan Capabilities:
o Run multiple cloud scans. Get comprehensive reports for informed decisions.
o Empower your entire team with shared insights.

Proactive Risk Identification: Our AI-powered platform identifies potential vulnerabilities in third-party tech vendors, helping you mitigate risks before they escalate.

Enhanced Cloud Security: Safeguard your sensitive data with our robust cloud security solutions, protecting against cyber threats and data breaches.

Streamlined Compliance: Relambda's automated reporting and data analysis help you stay ahead of regulatory requirements, reducing compliance risks.
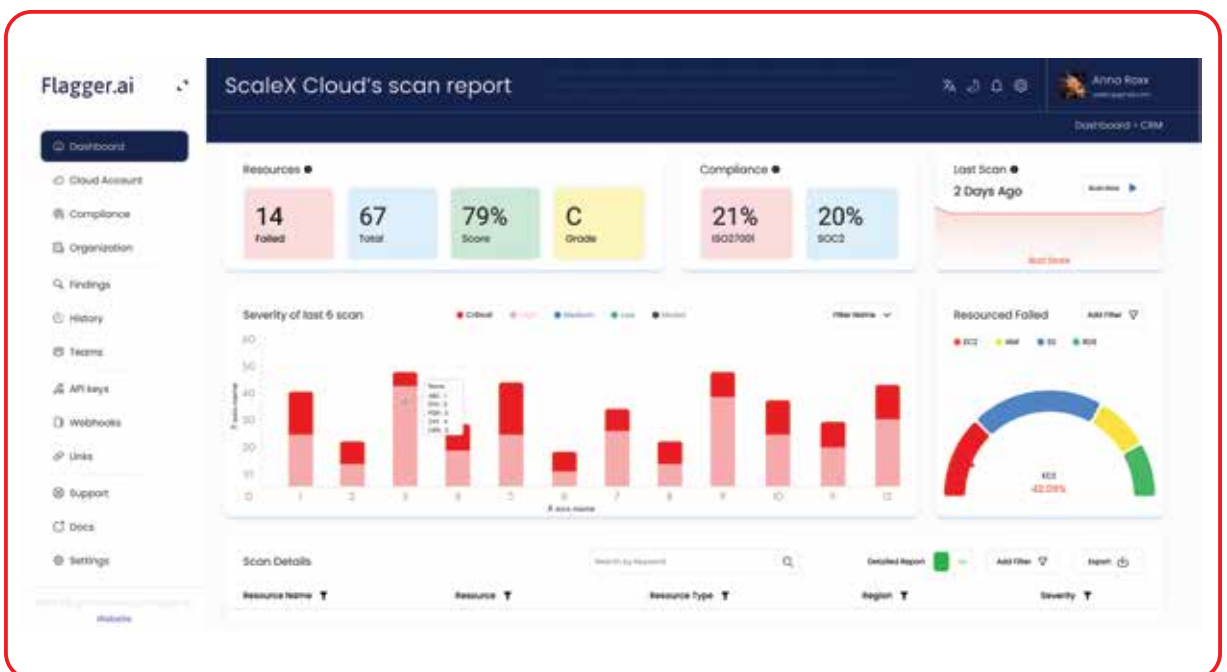

Resilient Business Continuity: Build robust business continuity plans with Relambda's advanced simulation capabilities, ensuring uninterrupted operations even during unforeseen disruptions.

Insights available on Flagger

Resources: Identify resources with vulnerabities
Compliance: Overall infratructure complaince
Security Insights: Actionable security alerts for potential threats

Our Offerings

Managed DevOps

Optimize your development operations for improved velocity & reliability

Cloud Migration

Lift-n-Shift or mordenize your data center operations to the cloud of your choice

Kubernetes Consulting

Streamline your Day 2 operations for Cloud Native environments

Security Compliance

End-to-end services for SOC2, ISO27001 & other major compliances

Cost Optimization

Reduce your cloud bills by 30% to 70% using our consultation services

GenAI

Leverage the power of Generative AI to build applications of the future
